

Get **paid** to advance the future of medical science

How it works

Contributing to [Geno.Me](#) is like participating in a digital clinical study

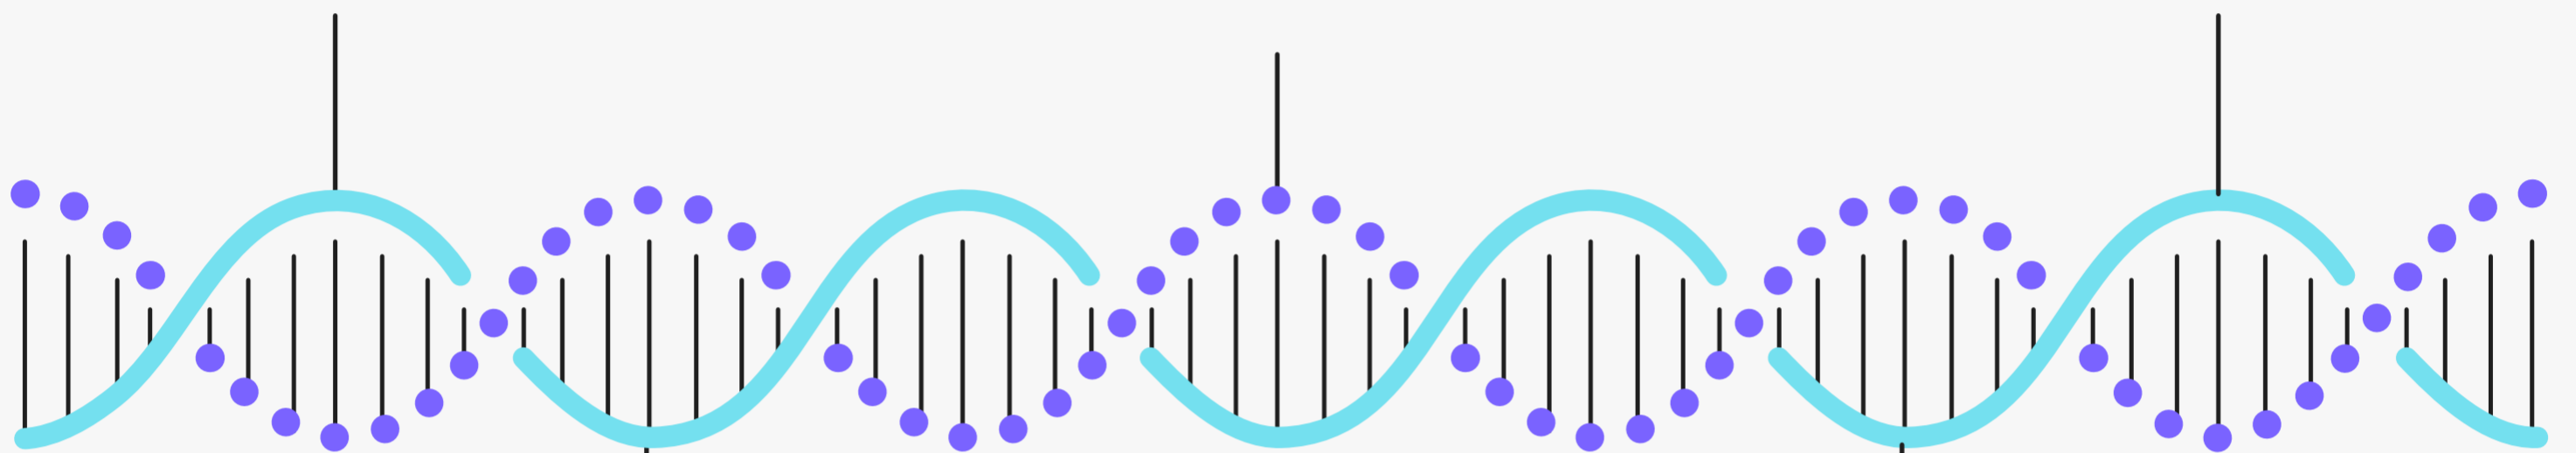

1) Create an account and upload your data

3) Researchers search our database for patients like you

5) They develop new treatments that advance medicine

2) Your personal information is de-identified to protect your privacy

4) You get paid \$40 each time there's a match

Your data is VALUABLE

Just like your online activity data is valuable to advertisers, your health data is valuable to medical scientists.

It's YOUR data. YOU should control it.

With Geno.Me your data is secure and YOU profit from sharing it. There's NO LIMIT on potential earnings.

It's easy to contribute

Simply upload data from 23&Me, Ancestry, or your doctor's patient portal.

Make a difference for patients

Patterns in health data are key to our understanding of medicine and disease.
